DETAILED ACTION

Response to Amendment

1. Applicant's response filed July 31st 2006 has been entered and made of record.
2. Applicant has amended claims 13 and 15. Applicant has added new claims 19 and 20. Claims 1-12, 14 and 16-18 have been cancelled. Claims 13, 15, 19 and 20 are now pending.
3. Applicant's remarks have been fully considered and are found persuasive in view of the presented amendments and in view of the multiple telephone interviews conducted pertaining to the applied references. The pending claims are therefore found to be allowable and reasons for allowance are given below.

Allowable Subject Matter

Claims 13, 15, 19 and 20 are allowed.

The following is an examiner's statement of reasons for allowance:

The distinctions between the prior art and the claims as presently recited are presented at length in the applicant's remarks. With regard to independent claims 15 and 19, basically the references of Hossack and Cheung do not disclose calculating the degree of motion as claimed using a plurality of image pairs. Hossack discloses determining motion vectors using pairs of images and their differences, but is distinguished from the presently recited claims by the inclusion of the use of the motion

degree calculated from a plurality of image pairs being used to control the random noise reducing section in claim 15 and the noise reducing section in claim 19 based on the motion detection. None of the other found prior art teaches or fairly suggests the recited features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
